(or specify OPAT if this is required)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| **Multi-agency (health, social and voluntary care) service to reduce avoidable ED attendances**  
**Short term support for adults in crisis situations**  
**Clinician to clinician discussion to agree suitable approach for patient**  
**Urgent assessments can be arranged within 2 hours**  
**The team can also step patients up into community beds if they are not safe to remain at home but do not require an acute hospital bed.**  
**The team also provides short-term primary, secondary and community care approach for patients with nursing needs, to be treated in their own home, preventing acute admission, or facilitating early discharge.**  
**The team also houses the OPAT service (outpatient parenteral antimicrobial therapy) The OPAT team provide an enhanced IV antibiotic service in the community to manage the delivery of intravenous antibiotics to patients who are medically stable, within their own homes.**  
**This team also provides an admission avoidance service to the Emergency Department and fracture clinic at Ipswich Hospital, ensuring patients are supported to remain in the community wherever possible.**  
**The team consists of nurses, occupational therapists, physiotherapists, health care assistants, generic workers as well as Red Cross and Suffolk Family Carer support workers.** |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
