

Direct Access MRI Internal Acoustic Meatus (IAM) for Adults

Referral

- Patients with Unilateral tinnitus which has been persistent for more than 3 months:

Patients must fit the following criteria:

- Adult patient (>18 years of age)
- History - no other symptoms, such as vertigo, otalgia, otorrhoea
- Examination – able to see normal tympanic membranes bilaterally

Request **MRI IAM** directly **via ICE** or if your practice does not have access to ICE send the referral directly to the MRI Dept, West Suffolk Hospital or call the Appointments Clerk on 01284 712891.

For MRI requests please ensure you mark the referrals '**Direct Access IAM**' so that we are able to track them.
