

**MAR chart reconciliation form**

Please use this form to inform the community pharmacy of items which are still listed on the patients MAR chart, but are not actively being used. This will apply to all items which are no longer listed on the patient's repeat, and items which are not being given as a current acute course, including dressings, inhalers, creams and sprays, as well as drugs which may no longer be needed.

If you are unsure of whether the patient is still using one of the items listed, then please contact the GP surgery to confirm.

**Please use one form per patient**

Dear Pharmacist, Please remove the following items from the printed MAR charts for the listed patients, as they are no longer of clinical need.

Patient name: \_\_\_\_\_

NHS number: \_\_\_\_\_

DOB: \_\_\_\_\_

Name of drug	Strength	Directions	Additional comments

MAR charts should only contain items being currently used by the patient in order to reduce errors in reconciliation and administration of medicines.
