

Re: Supply problems with Sucralfate tablets and oral suspension

There is a long term ongoing manufacturer's delay affecting the availability of both **licensed** sucralfate tablets and the oral suspension.

Until this issue is resolved, there are unlicensed products which can be sourced by any pharmacies through IDIS or any other MHRA approved unlicensed medicines suppliers.

IDIS Limited can be contacted on Tel 01932824000 and their product may take 2-4 working days to obtain. All local pharmacies should be able to order directly through their usual ordering processes and therefore there should be no reason to refer patients back to the hospital due to a lack of supply.

Unfortunately the manufactures have no further advice on alternative UK suppliers or alternative products that can be used instead of sucralfate.
