28th January 2021

Dear Healthcare Professional,

Napp has taken the difficult decision to withdraw Flutiform[®] k-haler[®] (fluticasone propionate and formoterol fumarate dihydrate) from the market from April 2021 (125/5MCG) and August 2021 (50/5MCG) due to the complex and costly manufacture of the product which means it is no longer commercially viable.

Discontinued Products – flutiform[®] **K-haler[®]**:

Product	Active Ingredient
Flutiform [®] K-haler [®] 50 microgram/5 microgram per actuation pressurised inhalation, suspension	Fluticasone propionate and formoterol fumarate dihydrate
Flutiform [®] K-haler [®] 125 microgram/5 microgram per actuation pressurised inhalation, suspension	Fluticasone propionate and formoterol fumarate dihydrate

We remain committed to respiratory medicine and will be there to support healthcare professionals and patients. Flutiform[®] pMDI, our well-established product with the same ICS/LABA combination and dosing as Flutiform[®] k-haler[®] remains available to prescribe^{1,2}.

Continuing availability – flutiform[®] **pMDI**:

Product	Active Ingredient
Flutiform [®] pMDI 50 microgram/5 microgram per actuation	Fluticasone propionate and formoterol fumarate dihydrate
Flutiform [®] pMDI 125 microgram/5 microgram per actuation	Fluticasone propionate and formoterol fumarate dihydrate
Flutiform [®] pMDI 250 microgram/10 microgram per actuation	Fluticasone propionate and formoterol fumarate dihydrate

Please contact medicalinformation@napp.co.uk if you have any further questions or concerns.

Yours faithfully,

Dr Ogün Sazova
Medical Director
