

Running the eFI Report on Emis Web

eFI in Emis Web is automatic and runs in the background for appropriate patients. When you open a patient, the pink popup reminder box in the bottom right hand corner of screen will display the eFI as a background search with Mild, Moderate or Severe already identified.

If at this point you click on the frailty prompt, Emis will give the score (required if you want to put this number into the clinical record).

At this point, you can code them as mild moderate or severe frailty, if you feel that is clinically appropriate

Frailty	eFI Score
Fit	0 - 0.12
Mild	0.13 – 0.24
Moderate	0.25 – 0.36
Severe	= > 0.36
