Mission Statement

The Eastern Region Hepatitis C Operational Delivery Network (HCV ODN) was established in August 2015. It forms one of 22 HCV ODN nationally.

Our aim is to care for and treat all patients with HCV in the Eastern region. A team of highly dedicated and trained health care professionals deliver HCV care and treatment in settings that encourages patient engagement. We offer care and treatment in hospital clinics; outreach GP surgeries, drug and alcohol services and prisons within the Eastern region. Allowing equitable and fair access to HCV care and treatment is the fundamental commitment of the Eastern region HCV ODN. Raising awareness of HCV through education and case finding is a priority in achieving the NHSE HCV elimination goal of 2025.
