

DXS Form Validation

DXS have introduced validation functionality to referral forms. Validation can be displayed in two ways:

- a) Forms can validate upon loading (immediate warning of guidance) or
- b) Forms can validate on completion (warning only visible when form is completed).

This can be tied to any set of criteria relating to a form and will warn the User accordingly depending what data is available for the patient. For example if a child form is loaded with an adult patient, the User will be notified they are using the incorrect form.

The CYP Emotional Wellbeing referral form has validation on the DOB field. This form is for patients aged 25 years or younger. The example below shows the screen when an invalid date of birth is entered. Please be aware that in most cases the validation functionality will not stop the user from referring; it is there just to point out that the criteria has not been met.

! Patient HUNTER, Megan (Miss) - 304 133 8351 is currently loaded

Please ensure the referral form is completed in full to be accepted within the EWH to enable us to accurately risk rate and triage the referral.
Please email the completed form to nmh-tr.ewh@nhs.net – please use a read receipt which will confirm the referral has been received.

1. Referrer Details

Name:	QA, Content (Mr)-
GP, Practice Nurse or other professional	GP
Referring GP Practice:	DXS Test Environment 1 Wrecclesham House, 4567 Wrecclesham Road Wrecclesham Farnham, Surrey GU10 4PS
