

How to access travel health information on DXS

1. Click on the 'Education' tab on the top DXS toolbar.
2. Enter the country you would like information for in the search bar on the right hand side and click on the search icon.
3. Double click on the appropriate search result to view the travel health information.
4. Alternatively, you can expand the 'Travel Destinations' folder on the DXS tree and select the country of interest.

The TravelHealthPro information provided on DXS is updated regularly.

Weblinks are provided at the top of each page to the TravelHealthPro website for information about recent outbreaks and important news.

BAHAMAS

Polio	Low to High			X
Tetanus	Low to High		Booster dose	

Non-vaccine preventable risks

Risk	Prevalence
Polio (polio and wild polio)	Low to High
Diphtheria	Low to High
Polio	Low

Vaccine Preventable Risks

YELLOW FEVER

- There is no risk of yellow fever in the Bahamas, however, there is a certificate requirement.
- Under International Health Regulations (2005), a yellow fever vaccination certificate is required for travellers over 1 year of age arriving from countries with risk of yellow fever transmission and for travellers having transited more than 12 hours through the airport of a country with risk of yellow fever transmission.
