

## Information for health and social care workers on arranging second doses of COVID-19 vaccine

For maximum protection against COVID-19, we need two doses of vaccine. It's really important that you have the same vaccine (either Pfizer or AstraZeneca) for your second dose, as you had for your first. Please find details of how to arrange your second dose below. Please make sure you bring proof of identification and eligibility (e.g. your work ID) with you to your COVID-19 vaccination appointments (you will not be given your vaccination without it).

### If you had your first dose at one of EPUT's large vaccination sites (AstraZeneca)

- You should book your second dose of vaccine via the [national booking system](#). Please select the same vaccination centre as where you had your first dose.
- If you have had your first dose of vaccination at one of these sites **but are unable to book your second dose** through the national booking system, please let us know by email to [epunft.cv19.staffvaccinations@nhs.net](mailto:epunft.cv19.staffvaccinations@nhs.net), so that we can ensure that your vaccination record is updated on the system.
- These large vaccination centres run by EPUT are:
  - Alastair Farquharson Centre at Thurrock Community Hospital
  - Chelmsford City Racecourse
  - Chevington Close, Bury St Edmunds
  - Clacton Hospital
  - Gainsborough Sports Centre in Ipswich
  - Harlow Leisurezone
  - JobServe Community Stadium, Colchester
  - The Cliffs Pavilion, Southend-on-Sea
  - The Lodge, Runwell, Wickford
  - The Mill Arts and Events Centre, Rayleigh

### If you had your first dose at Colchester or Ipswich hospitals

- If you booked your first dose after registering online, you will have been sent an email the day after your first dose appointment asking you to book your second appointment 11-12 weeks later.
- If you attended Colchester or Ipswich hospital as a "walk in" without prior booking, you will need to register at [covac.esneft.nhs.uk](http://covac.esneft.nhs.uk) in order for your second vaccination to be organised. Please email [stafftesting@esneft.nhs.uk](mailto:stafftesting@esneft.nhs.uk) if you have any issues registering or any queries around the vaccination process.

### If you had your first dose at West Suffolk Hospital

- You will have booked your second appointment online, when you booked your first appointment. The time and date were contained in your confirmation email. You will also have received a confirmation email after attending your first appointment with a 'virtual vaccination card' with details of both doses.

### **If you had your first dose at Southend, Basildon or Broomfield Hospital (Pfizer)**

- If you had your first dose before 30 December 2020, you should now have a second dose appointment booked. Please check your online account at [covid.shiftpartner.com](https://covid.shiftpartner.com) for details.
- If you had your first dose on or after 30 December 2020, you can book your second dose online at [covid.shiftpartner.com](https://covid.shiftpartner.com). Please log on using the same details you used for your first dose appointment.

### **If you had your first dose at Princess Alexandra Hospital, Harlow**

- You should have booked your first and second dose online at the same time, or your second dose appointment would have been booked for you when you attended your first dose appointment.
- If you have had your first dose of vaccine at Princess Alexandra Hospital but don't have a booking for your second dose, please email [epunft.massvacc@nhs.net](mailto:epunft.massvacc@nhs.net) so we can help you resolve this.

### **Vaccinations at any other locations**

If you had your appointment in a community location such as a GP surgery or community centre the provider of that service will make arrangements for your second appointment and will be in contact separately.

You can [find more information about the COVID-19 vaccine on nhs.uk](https://www.nhs.uk).
