

GLP-1 RECEPTOR AGONIST THERAPY IN TYPE 2 DIABETES: AN OVERALL APPROACH

(To be used in conjunction with existing guidelines and SmPC of individual drugs)

First line therapy is Metformin in addition to lifestyle changes (optimal physical activity and weight reduction)

* Adapted from EASD/ADA T2DM 2020 guidelines: Buse J.B et al. Diabetologia. 2020; 63:221-228

** Based on advice from local diabetes centre at ESNEFT
