

One Clinical Community

Safe, Sustainable, inSpiring

The local and national challenge

Increased demand across health and care

Critical holes in clinical staffing within general practice and some specialities

Recruitment of allied professionals supporting lead clinicians requiring supervision, training and development

Financial constraints – no 'new' money

The national response

5-year Forward View

GP Forward View

Mental Health Forward View

5 year system-wide Sustainability and Transformation Plans

- our mandated geography is NE Essex, West Suffolk and Ipswich & East Suffolk

Acute reconfiguration

Primary care at scale

The Prize

Continuous improvement in patient care/safety

Care standard control

Safe, manageable workloads for all

Attract and retain 'The Best' staff

Firm Local Foundations to build on ...

Alliance contracting

- *community services*

Clinical Transformation Boards

- *new models of secondary-community-primary care*

- *with our core providers including Ipswich Hospital*

Primary care at scale

- *becoming a reality*

Connect

- *joined up neighbourhood care*

Work-In-Progress 2016/17

Joint Clinical Transformation Groups

- MSK (*lessons being learned by all of us*)
- Ophthalmology
- Gastroenterology

Care Home Optimisation

- Care UK /GP Practice /IHT/ Ambulance /OOH / CCG

The Next Steps ...

Development of a unified clinical community, with common purpose

- Shared dialogue
- Streamlined and aligned planning
- Seamless service delivery

Supporting clinicians to become leaders

Development of new leadership skills

Strong, aligned management support across our health and care system

Questions (sessions 1 and 2)

1. If we were to be a successful (the most successful) clinical community what outcomes would you want to see for:
 - Yourself?
 - Your team?
 - Your patients?
2. How can we achieve this transformation by working collaboratively?
 - Reduce workload
 - Improve patient outcomes
 - Maintain financial balance

Questions

- How should we review and continually improve quality?
- What should we do collaboratively that will optimise care?
- How can we reduce workload by working collaboratively?
- What changes in your working practice would reduce your workload and optimise patient care?
