CCG Training and Education Event Feedback 06 February 2020

21 February 2020

How would you rate the speaker?

Answered: 48 Skipped: 17

ANSWER CHOICES	RESPONSES
Excellent	79.17% 38
Very Good	16.67% 8
Good	2.08% 1
Fair	2.08% 1
Poor	0.00% 0
TOTAL	48

Interactive, facilitative style of speaker, encouraging rather than admonishing...learnt a lot of useful tidbits.

Best speaker because he focussed on primary care issues

Loved the interaction. Obviously thought hard about how to discuss esoteric stuff

He was interactive, interesting and telling most of us new and helpful things.

Relaxed engaging presentation from knowledgeable but non-egotistic professional

Excellent presentation skills

Great lecture, interactive, relevant, not condescending. Confident and knowledgeable. More of the same please. Also important that Crawford Jamieson is a local Consultant.

How helpful did you find the Gastroenterology presentation? / What was good about it?

Answered: 47 Skipped: 18

ANSWER CHOICES	RESPONSES
Extremely helpful	74.47% 35
Very helpful	21.28% 10
Somewhat helpful	0.00% 0
Not so helpful	4.26% 2
Not at all helpful	0.00% 0
TOTAL	47

Really interactive, focussed on real life common problems in GI medicine. Thought provoking.

Very relevant to general practice. The cases presented were similar to a number of cases I have struggled with in the past and I have come away with a number of ideas to change my management of such cases in the future.

interactive, practical hints and tips very helpful

Very applicable to problems that we encounter on a regular basis

Case presentations were relevant and helpful. I learnt some useful new things.

The interactive case based approach with doing case scenarios instead of usual lecture

Too complex and detailed for attending paramedics

Is there anything that could have improved the session?

Needed to have been longer maybe!

No it was excellent!
Pitched just right

Not really. Maybe covered some more common issues too

Would be great if separate, less complex sessions could be delivered for non-practitioner nurses and paramedics.

Perhaps a follow up short summary of key take home messages for primary care that arose from each case would help reinforce action points for improved quality of collaborative practice for those present and update those missing as the presentation slides alone would not do that.

What did you learn from the session and how will you do things differently in practice?

Some new diagnoses to consider

Treatment for CVS is like that of migraine so is certainly manageable in primary care

I learnt something new from each of his cases and will be more confident in handling gastroenterology patients as a result.

Not order an amylase!

Be more confident in recognising unusual presentations

Reinforced present knowledge, but Guardia case study and link to skiing new to me. Will use GI advice service.

Management of gallbladder polyps will change.

Helped me to understand and manage better some of our more challenging cases

Q7: How helpful did you find the prescribing meeting?

Answered: 16 Skipped: 49

Prescribing Leads Meeting – 6 February 2020, 2.15pm

ANSWER CHOICES	RESPONSES
Extremely helpful	12.50% 2
Very helpful	68.75% 11
Somewhat helpful	18.75% 3
Not so helpful	0.00% 0
Not at all helpful	0.00% 0
TOTAL	16

What was good about the session?

Opportunity for feedback
Interactive session

The resources through the
Specialist Pharmacy Service

Clear presentations -
on topics which matter

Useful information re Vitamin B strong,
ondansetron, electronic cigarette use,
valproate

How could the session have been improved?

Not sure the rest of it* was useful in
benchmarking but we can get that
from looking at the data anyway.
(*other than SPS presentation)

May have some items on how to
use SystemOne more effectively
in medicines management

Less content - speakers had too
much to cover in the time allocated
Could have been longer as end of
meeting slightly rushed

What was the most valuable thing you learned from the session?

Ondansetron is a red drug for
everything except palliative care - will
push inappropriate requests for scripts
back to the hospital.

I thought all our **valproate** women
had a consent form but it appears
work is needed still

Website links and contact
details for **Specialist
pharmacy service** locally

Primary Care Network Meetings

Individual PCN Meetings – 6 February 2020, 4pm

- Very helpful to meet the other members of our PCN for the first time and to gain an understanding of some of the politics involved.
- A shame that the new contract did not arrive until the following day which means that we still need to have this meeting. However it did allow us to meet up and share with broader team and catch up on PCN related QoF work. So very useful.
- Despite the subject not being my preferred one, I enjoyed the familiar atmosphere, the bluntness and frankness which the whole meeting was characterized by. I am poor at politics. However the take home message was : joint effort makes the difference.
- There was a sense of camaraderie setting staff from other practices with the PCN
- Audit session useful
- Details of projects planned for PCN.
- Useful explanation of aims of PCN in next year with good discussion
- Useful to see what is going on
- Useful in meeting colleagues in Orwell PCN and share views and thoughts for future practice development
- Good meeting with Two Rivers Practice
- Useful to meet with other local practices
- Good to get update and talk to local colleagues
- Really useful to incorporate this into the shut down afternoons
- It would be great if we could have regular protected time to develop this new service
- Good to have a time when more people can come.
- Bit late in the day

Other sessions / suggestions for training topics or any feedback on the afternoon overall, please let us know.

PCN Clinical Directors Meeting

- Useful always and improved by being curtailed

Primary Care Nurse Forum

- I really enjoyed the session Thank you

General

- Would love tea or coffee on arrival, many have come from a busy morning surgery
- Orthopaedic pathways
- Podiatry
- Community paediatrics.
- Dr Sharma- endocrinologist is an excellent speaker on diabetes
- Similar case base teaching on haematology and dermatology would be useful too
