## Agenda

This month's forum is slightly shorter as the main educational event agenda includes an update on the new National Diabetes Prevention Programme and a presentation on the diabetic foot, which I thought you would be interested in attending.

Society's health is determined primarily by a range of social, economic and environmental factors, social prescribing seeks to address people's needs in a holistic way. It also aims to support individuals to take greater control of their own health. The wider determinants of health such as lack of money, poor education, poor quality of housing, low self-esteem, isolation, relationship difficulties, both physical and mental health problems negatively impact people's health and wellbeing. Ipswich & East CCG Connect for Health social prescribing programme assists individuals to find non-clinical solutions to improve their own health and wellbeing.	<b>Connect for Health Leads</b> , David Grimmer (Suffolk Family Careers), Sally Oakley (Ipswich Citizens Advice), Jas Ross (The Shaw Trust) & Hayley Stearn (Access Community Trust).
